

ENDANGERED AND THREATENED SPECIES SERVICES

Since its inception in 1986, **Amy S. Greene Environmental Consultants, Inc. (ASGECI)** has provided professional environmental services for Federal, State and local public agencies; and private sector clients in 11 states to facilitate and expedite planning, design, permitting and construction. **ASGECI** is a small, women-owned business and holds a GSA Schedule. **ASGECI** has an excellent reputation for quality work with local, State and Federal agencies.

Our Services Include:

- Endangered and threatened vegetation and wildlife species surveys and biological assessments
- ✦ Aquatic, Marine and Terrestrial ecological surveys and Wildlife surveys
 - ✦ Habitat restoration, reforestation and management plans
 - ✦ Stream, streambank and riparian corridor restoration design and construction monitoring
 - ✦ Wetland mitigation design, installation and construction and post-construction monitoring
 - ✦ Wetland delineation, functional assessment and permitting
 - ✦ Environmental Impact Assessments and Impact Statements - NEPA, State and Local
 - ✦ Soil Erosion and Sediment Control Planning and Monitoring
 - ✦ GIS mapping and analysis/GPS mapping
 - ✦ Environmental Construction Monitoring

ASGECI holds a GSA Schedule in the following Special Item Numbers:

- ◆ 899-1: Environmental Planning Services and Documentation
- ◆ 899-7: Geographic Information Services

ASGECI scientists have specialized expertise in conducting habitat assessments and surveys for State and Federally listed **threatened and endangered plant and animal species**. Our scientists are certified by the United States Fish and Wildlife Service (USFWS) in numerous States and recognized by State Resource Protection Agencies to conduct surveys and perform Biological Assessments for targeted species.

ASGECI scientists have expertise in birds, including shorebirds, passerines, herons and raptors; reptiles and amphibians; mammals, including bats; terrestrial and aquatic invertebrates, including freshwater mussels; and terrestrial and aquatic plants including submerged aquatic vegetation. Services regarding endangered and threatened species include: threatened and endangered species habitat assessments; presence absence surveys, including visual searches, call back response surveys, trapping and netting; impact analysis; development of measures to avoid or reduce adverse impacts; design and implementation of management plans; construction monitoring; and post construction monitoring.

ASGECI has provided endangered and threatened species services for publically-funded projects at the municipal, State, and Federal level and to private clients for diverse projects including: transportation (highway, bridge, rail, port, airport); energy generation and transmission; education; water and wastewater; solid waste; stormwater management; contaminated site remediation; parks, recreation and conservation lands; military facilities; and institutional, residential, commercial, industrial and religious development. Staff members have a positive working relationship with the USFWS, NMFS and State wildlife resource agencies.

REPRESENTATIVE ENDANGERED AND THREATENED SPECIES PROJECT EXPERIENCE

- ✱ **Piping Plover Breeding Season/Nest and Construction Noise Monitoring, Ocean City-Longport Bridge, Atlantic and Cape May Counties, NJ.** Conducted three year breeding season/nest monitoring of the federally threatened, state endangered piping plover during bridge construction adjacent to breeding colony. Coordinated with NJDOT, Parsons Brinkerhoff – FG, Inc., Federal Highway Administration, NJ Endangered and Non-game Species Program (ENSP) and the US Fish and Wildlife Service. This three year study was performed to determine if noise from pile driving activities for bridge construction would interfere with breeding productivity of the piping plover. In addition, gathered data for the ENSP on other colonial beach nesting birds utilizing the dunes in the area.
- ✱ **PPL Gas-line Repairs Bog Turtle Services, Upper Mount Bethel Township, Northampton County, Pennsylvania.** Gas pipeline maintenance project. ASGECI provided a staff USFWS Recognized Qualified Bog Turtle Surveyor to perform wetland delineations, perform Phase I Bog Turtle Habitat Surveys, consult with US Fish and Wildlife Service, and perform construction monitoring during the gas pipeline anomaly repairs.
- ✱ **Liquefied Gasline Culvert Crossings Project, Potopcon Township, Chester County and Towemincin Township, Montgomery County, Pennsylvania.** ASGECI staff USFWS Recognized Qualified Bog Turtle Surveyor conducted Phase I Bog Turtle Habitat Surveys on above ground gas mains above stream culverts. PECO proposes to install the mains underground. Six culverts were investigated utilizing protocols outlined in the USFWS Bog Turtle Northern Population Recovery Plan (USFWS 2001, rev. 2006).
- ✱ **Colonial Waterbird Nest Surveys and Visual Utilization Count Surveys, Route 52 Causeway Ocean City and Somers Point, Atlantic and Cape May Counties, NJ.** Conducted an initial nest count survey of a Black and Yellow-crowned night heron (both listed species in NJ) rookery. Over 400 nests were counted. Conducted a three year breeding season survey of the rookery to provide a baseline count of both night heron species. Based upon survey results determined utilization of the rookery by the herons. All heron species were noted flying in the vicinity of the rookery. Counted the departure and arrival flights of night herons at dawn and dusk. Coordinated with NJDOT, Michael Baker Associates, and the NJ Endangered and Non-game Species Program (ENSP). The study was conducted to provide a baseline to determine if the population of night herons will be affected by the construction of the elevated causeway and the Ocean City Visitor Center.
- ✱ **Barred Owl, Cooper's Hawk and Red Headed Woodpecker Call-back Surveys, Robert J. Miller Airpark, Berkley and Lacey Townships, Ocean County, NJ.** ASGECI initially prepared an E&T species survey protocol that was submitted to the NJ Pinelands Commission (NJPC) for their review and approval. Following approval of the protocol, ASGECI performed E&T species field surveys throughout the RJMA study area for nine species. The surveys identified barred owl, pine snake, Pine Barrens treefrog, red headed woodpecker, and grasshopper sparrow utilizing the study area. Based on the results of these surveys, ASGECI developed critical habitat maps for the various species. Survey results, a detailed report and the critical habitat mapping were provided to the NJPC for their review. Call –back surveys were performed for Barred Owl, Cooper's Hawk and Red-headed Woodpecker. Barred Owls were documented utilizing the wetlands at this site. Cooper's hawks were not documented at the site and Red-headed woodpeckers did not respond to the call back surveys though they were noted at the site.
- ✱ **Egremont Bridge Replacement, Route 41 over Karmer Brook, Wood Turtle (*Clemmys insculpta*) Construction Monitoring, MassHighway Project No. 602059, Town of Egremont, Berkshire County, MA.** Under the requirements of the MA Natural Heritage and Endangered Species Program (NHESP) of the division of Fisheries and Wildlife for bridge and roadway projects occurring in the vicinity if high-priority wood turtle populations, implementation of Protocol II, Full Protection Plan throughout the duration of the project is required. ASGECI provided worker training and reporting procedures; and construction monitoring for wood turtle, including inspection of silt fence barrier installation, turtle monitoring and erosion and sediment control measure inspections. Inspection reports are sent to NHESP.
